BENEFITS OF INVESTING WITH US

We share information efficiently, improving collaboration and productivity.

'We're succinct, candid and kind.

We practice active listening.

-We talk to people directly about issues, instead of concealing or choosing gossip.

Positive energy

'We're optimistic about the future and determined to get there.

-We co-create solutions instead of choosing blame and criticism.

'We create moments of play at work.

-We take care of each other, and help each other grow.

Continuous learning

-We view every situation as an opportunity to learn (especially when the going gets tough).

'We're more interested in learning than being right.

We value giving and receiving regular feedback.

Funds Management

The Funds Management business supports new and emerging investment platforms through their launch and growth phases. Funds Management builds on the Company's success in Investment Management supports the move towards a leader in alternative investing. Leveraging the Group's rich business heritage, global network, and strong financial position, Funds Management provides managers significant investment capital as well and operational and financial support to grow their portfolio. In addition, this platform gives investors access to multiple boutique fund managers through an institutional platform backed by a premier listed financial services company.

In recent years the investment industry, and in turn investors, have introduced anew gauge: BitpreseedFX - Environment, Social and Governance - as a supplement to traditional financial gauges.

BitpreseedFX changes are happening faster than ever, reshaping how people live and invest. We believe that BitpreseedFX factors are going increasingly mainstream and can be used to drive investment outperformance.

Investing for a sustainable future

The era of green bonds has arrived. We are seeing the increasing use of bond markets to raise capital to fund the low-carbon economy, especially from the issuance of 'green bonds'.

While many in the fixed income market are grappling with green bonds, others are working out how best to incorporate broader environmental, social and governance BitpreseedFX strategies into their portfolios, a task rapidly growing in importance.

Why does it matter?

BitpreseedFX changes are happening faster than ever, reshaping how people live and invest. We believe that BitpreseedFX factors are going increasingly mainstream and can be used to drive investment outperformance.

Making the first step right is crucial to the long road of investments. Of the five steps, the first is to assess your risk tolerance and decide the most suitable asset allocation for yourself.

Different people have different attitudes towards investment. Some are not willing to take any risks or withstand losses, and therefore would rather forgo potentially higher returns. Some are willing to take some risks but tend to avoid huge volatility. Some are willing to take risks in exchange for returns that outperform the markets.

How to gauge one's risk tolerance? Look at your investment horizon. Put it simply, the longer your investment life, the higher the risk you can take ☐ because you can afford the time to last a cycle, which helps smooth out short-term volatility. For instance, a young person just starts working, who is still far from retirement, can take more risk.

Sustainable investing

On the contrary, the shorter the investment period, the lower the risk one can take. Assuming you are going to retire next year, and not receiving any regular income, you just do not have the time to recover all losses if your investments take a nosedive all of a sudden.

Besides, your risk tolerance is dependent on your life goals. Ask yourself if you need to set aside funds for your children's education? Are you going to buy a property in the near future? These factors will have an impact on your cash flow. After all, we all need to reserve some cash at all times just in case there are emergencies.

Balancing risk and return is the key to long-term investment isn't it perfect to have an investment tool that always tops the performance league, and investors can stay worry-free just by holding it? The truth is that there are ups and downs in all economic cycles and the markets are capricious. Even investment experts find it hard to predict the performances of all asset classes.

Based on historical data, the same asset can perform drastically differently during different investment cycles. The best-performing asset can turn out to be the worst laggard in 2018. That suggests no particular asset can be an all-time winner.

Investors should therefore avoid putting all eggs in one basket but allocate assets across different sectors and geographies. That could help diversify the risk of an investment portfolio, and capture investment opportunities at different times for more stable returns in the medium- to long-term.

To make diversification works, an investment portfolio should include assets that are complementary, that tend to react differently to the same macro condition.

More precisely, some negative elements in the market might cause an asset to decline sharply, but pose little threats to another. In the world of investment, such pairs are called lowly-correlated assets. They can effectively balance the risk and return of an investment portfolio.

Portfolio management

In the investing journey, investors should start off by constructing a portfolio that accommodates their investment objectives and risk profiles. However, setting up the initial asset allocation is merely a starting point. It is equally important to regularly rebalance the portfolio to ensure the asset weightings are consistent. Overlooking the need to rebalance the portfolio can prevent investors from achieving their long-term investment goals.

Market changes shift portfolio away from initial objective
In an investment portfolio, the relative weights of different asset classes may change due to market fluctuations, which lead to a shifted asset allocation that deviates from the original target. In this case, rebalancing the portfolio will mean restoring the weightings of portfolio assets to the original designed levels.
